Why Your Business is Not Showing Up on Google Maps in Granite Bay

When a customer in Granite Bay needs service, they pull out their phone and search on Google Maps. If your business is sitting on page 2 or ranked at position #8, you basically do not exist. The top 3 map spots get over 70% of all customer calls. When you are not in those top 3 spots, Google hands those high-ticket jobs straight to your competitors. Ranking in the top 3 comes down to three basic facts: setting your exact business categories correctly, uploading real job photos taken in Granite Bay every week, and making sure your business name, address, and phone number match 100% across the web.
